

Q) Setup a react application using CRA, and create a page which has the views/controls similar to the one given below:

The diagram illustrates a vertical stack of five rectangular boxes, each containing a text label, all enclosed within a larger rectangular frame. The labels, from top to bottom, are: "Heading", "Paragraph", "Paragraph", "Ordered List", and "Button".

Note

- You'll only need to edit in the App.js file created using CRA. If you want to create sub components you can do that as well.

Marking Scheme

[Correct Code Execution: 10, Correct Approach: 3, Code Readability: 2]
