

Q1) Using React Components design and develop a signup form as below:

1. Add a field for Name
2. Add a field for email
3. Add a field for phone
4. Add a textarea for address
5. Add a field for password

Next add CSS to make the form look better. You can also use bootstrap to achieve the same.

Add an event listener on the submit event of the form and display all the fields' value in the browser console.

Marking Scheme

[Correct Code Execution: 10, Correct Approach: 3, Code Readability: 2]
